

How dare you and the NAB try to dictate to satellite radio and try to prevent them from broadcasting local weather and traffic reports. We, the satellite subscribers, pay a fee to listen to their broadcast and I beleive we havs a right to receive the XM Instant Traffic & Weather information. nad the NAB has no right to prevent satelite radio from broadcasting it.I for one am sick and tired of the large corporations with their large campaign contributions and high priced lobbying efforts persuade Congress to do their bidding to the detriment of the average citizen.

This is our country and you should do what's best for us, the citizens, and not your large campaign contributors.

Satelite radio is providing a valuable service. LEAVE THEM ALONE.

Let the NAB improve their product and service and not try to down grade the competition through legislation. Is the NAB afraid of competition?

Now do the right thing and oppose HR 4026

Sincerley.

Barry Rudd
